SUMMARY

Full Stack MERN Developer with hands-on experience building scalable, AI-powered web applications. Skilled in integrating LLMs (ChatGPT, Claude, Gemini) and applying Prompt Engineering techniques to create intelligent, user-centric features. Proficient in Java, REST API design, MongoDB, and the complete MERN stack. Passionate about leveraging Generative AI tools to accelerate development and deliver innovative web solutions. Actively expanding expertise in LLM workflows and AI-augmented application development.

EDUCATION

B.Tech Information Technology

Sri Shakthi Institute of Engineering And Technology

Sep 2023 - Present

CGPA: 8.45

Higher Secondary School

TheNest School Hr.Sec Matriculation School

Jun2022 – Mar 2023

Percentage: 83.5

PROJECTS

Interview — AI-Powered Interview Preparation Platform | React.js, Node.js, Express.js, MongoDB, Groq API

- Integrated Groq API (LLM) to generate dynamic, role-based interview questions and answers, delivering personalized AI-driven content generation for diverse technical and HR interview scenarios.
- Engineered Prompt Engineering workflows to control LLM output quality and relevance, enabling consistent, structured responses tailored to job roles and experience levels.
- Designed secure REST APIs with JWT authentication and MongoDB storage to manage users, multi-session interview history, and pinned Q&A — ensuring data integrity and scalable performance.

Expense Tracker — Full Stack Financial Management App | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack MERN application with role-based secure authentication, enabling multiple users to independently manage and visualize personal financial data.
- Built interactive data visualization (pie charts, category breakdowns) and downloadable report exports, improving financial tracking clarity and user experience.
- Implemented RESTful API endpoints with Express.js and MongoDB for CRUD operations, ensuring performant and maintainable back-end architecture.

Console based Employee Management | Java

- Built a console-based application in Java to manage employee records, implementing user registration, unique ID generation, and CRUD operations for efficient data handling.

TECHNICAL SKILLS

Languages: Java, C, SQL, Basic Python

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Database: MongoDB, MySQL

AI / LLM Tools: Prompt Engineering, Groq API, ChatGPT, Claude, Gemini, LLM Workflows, Generative AI

Tools & Platforms: Git, GitHub, Linux, VS Code, IntelliJ IDEA, Postman

CERTIFICATIONS AND ACHIEVEMENTS

- Completed MERN Stack Development Certification (Udemy) — gained hands-on experience building full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Completed Data Structures and Algorithms Certification (Udemy) — developed strong problem-solving skills and understanding of core DSA concepts.
- Solved 400+ Data Structures and Algorithms problems across platforms, enhancing coding efficiency and problem-solving skills; earned Consistency and SQL Completion badges.
